

Asbestos

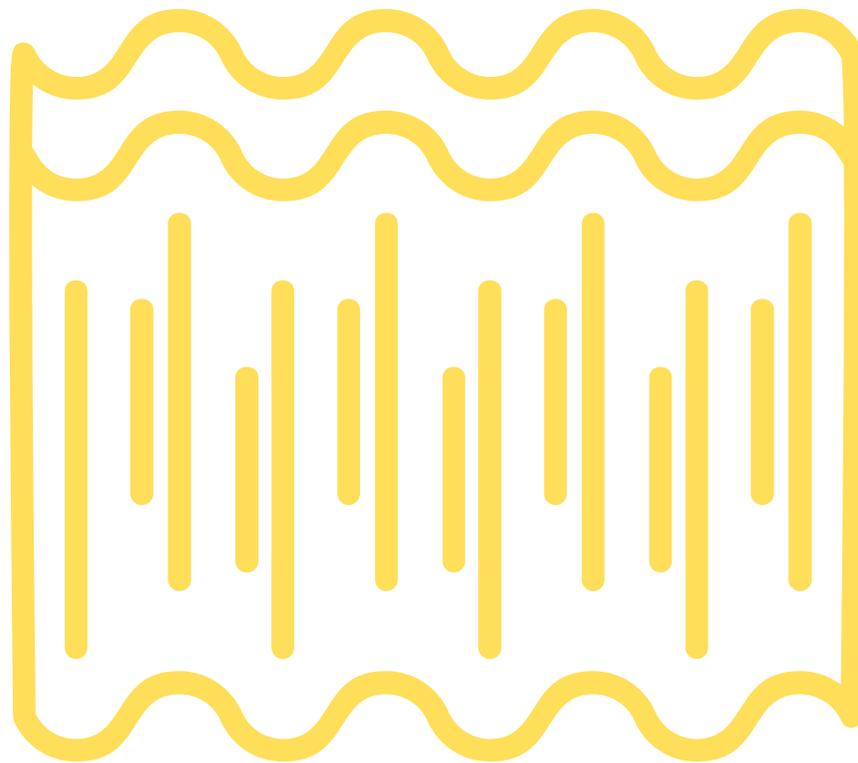

What you need to know

5,000

**people die every year
from asbestos related
diseases.**

Every tradesperson is likely to undertake work in a building that contains asbestos at some point.

There is no cure for
asbestosis once it has
developed.

**PREVENTION AND
CLEAR GUIDANCE IS
CRITICAL**

THERE IS NO SAFE LEVEL OF ASBESTOS

Asbestos can be in places that you might not expect, so you could come into contact with it without your knowledge.

Steps to take before you start:

Complete asbestos training

Request if a survey has been done or if there is an asbestos register

Check if the building was built or refurbished before the year 2000

Plan the job to avoid asbestos disturbance.
