

Getting

RISK

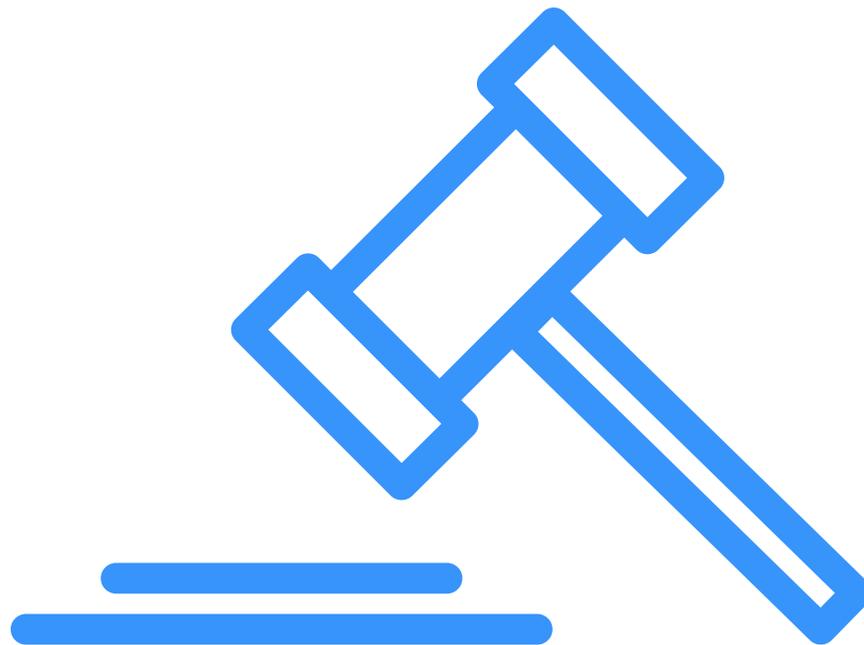

Right

**As an employer, you are
required by law to protect
your employees, and
others, from harm.**

Under the Management of Health and Safety at Work Regulations 1999,

the minimum you must do is...

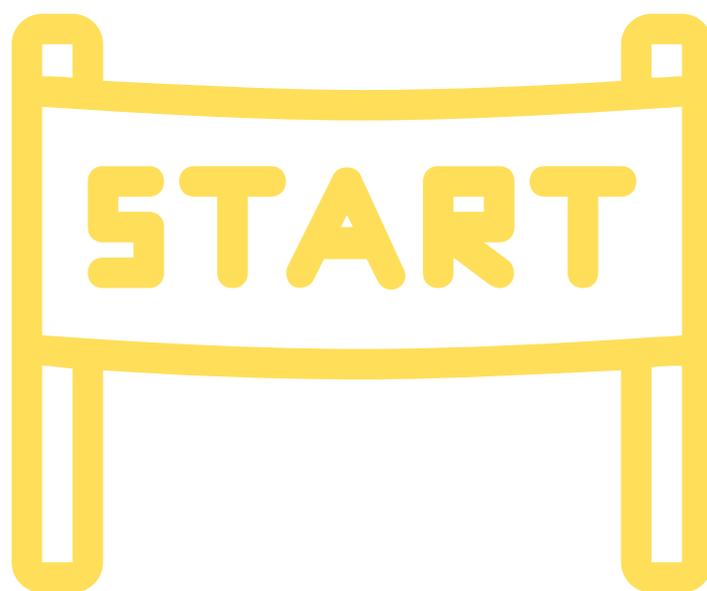

identify what could
cause injury or illness in
your business (**hazards**)

Decide how likely it is
that someone could be
harmed and how
seriously (**the risk**)

Take action to eliminate
the hazard, or if this isn't
possible, **control the
risk**

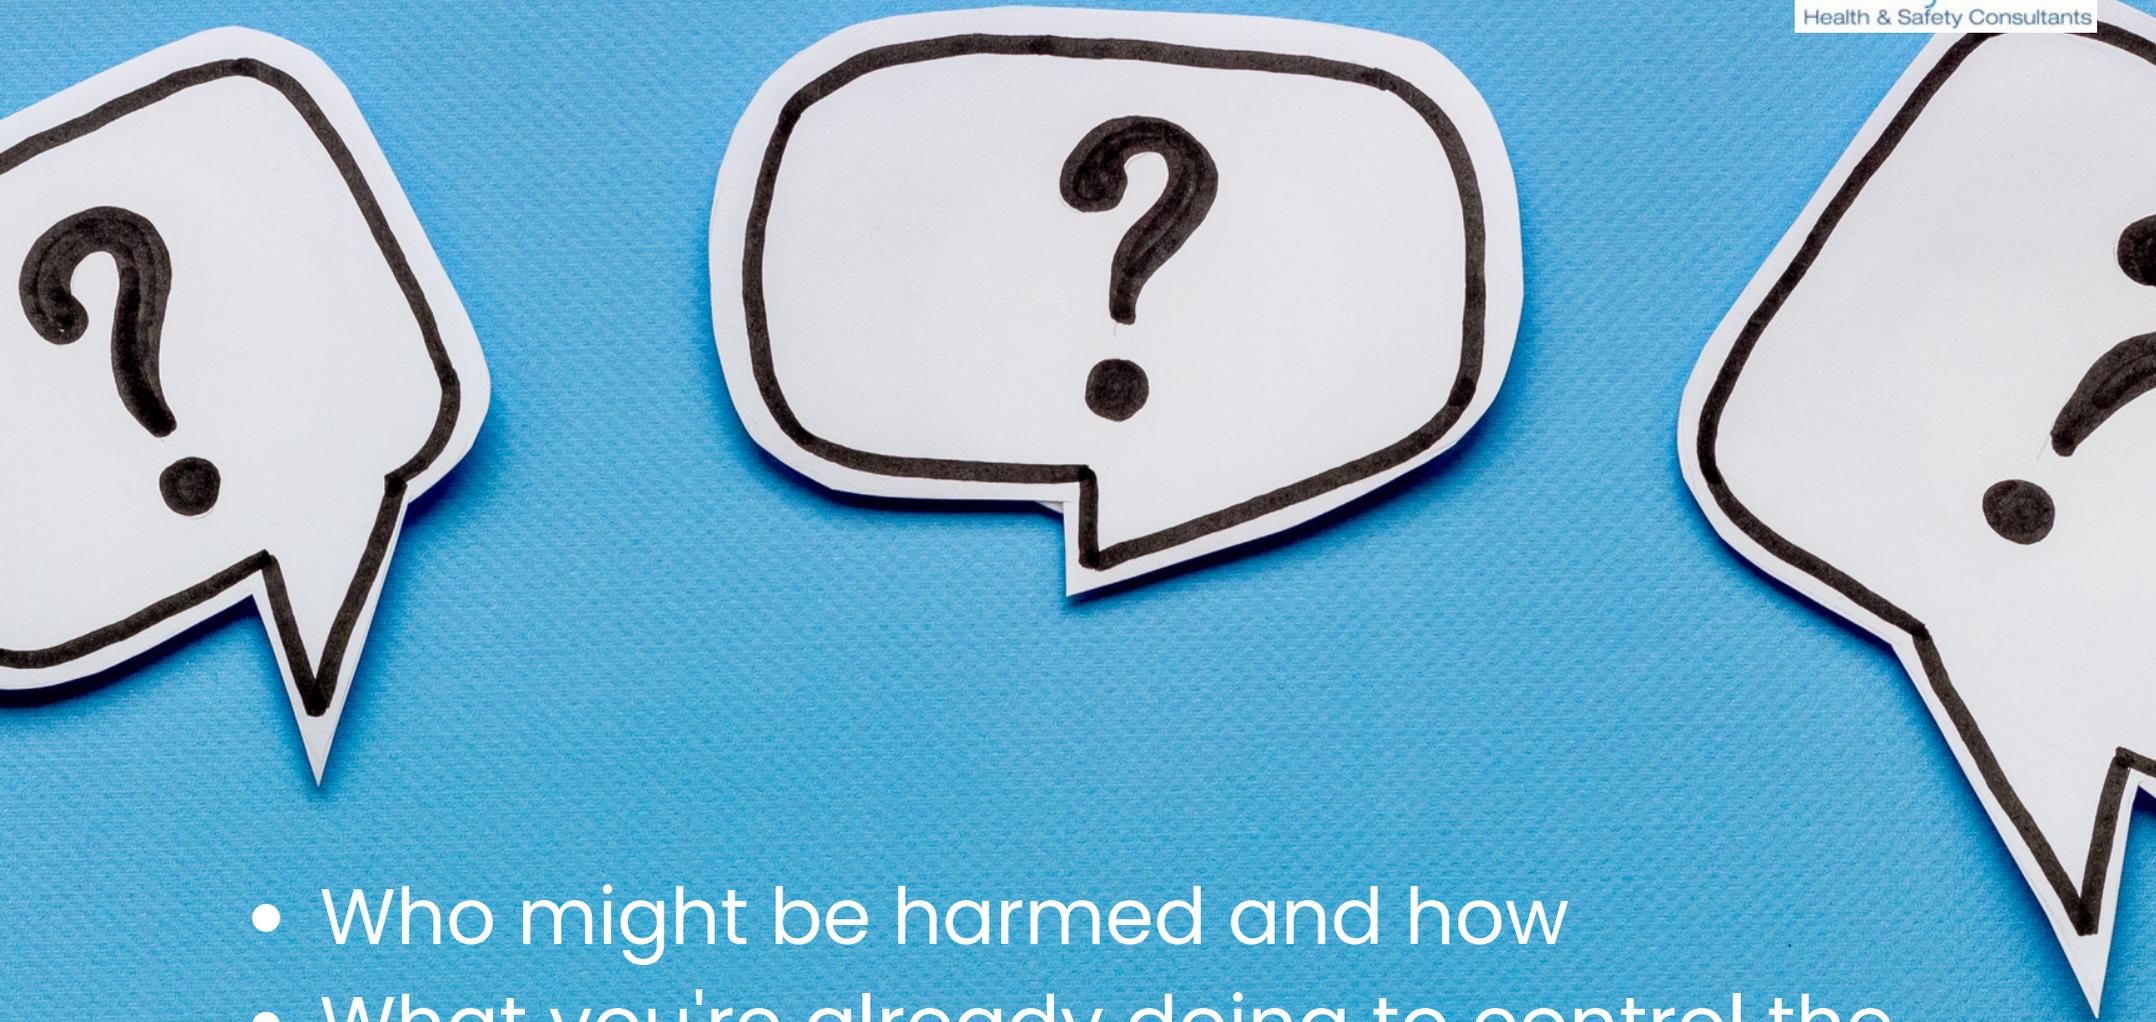

**Where do
you start?**

RISK ASSESSMENT TEMPLATE

A Risk Assessment template will provide guidance and advice on what you need to include and consider and will require that you answer the following questions >>>

- Who might be harmed and how
- What you're already doing to control the risks
- What further action you need to take to control the risks
- Who needs to carry out the action
- When the action is needed by

What risks should I consider?

Here's just a selection...

- Asbestos
- Confined spaces
- Display screen equipment
- Electrical safety
- Equipment and machinery
- Fire safety
- Gas safety
- Harmful substances
- Manual handling
- Noise
- Personal protective equipment
- Pressure equipment
- Radiations
- Slips and trips
- Vibration
- Working at height
- Workplace transport
- Work-related stress

Don't copy and paste

Risk Assessment is not one size fits all and you may not be legally compliant if you simply copy a template!

Different regulations and rules apply depending on your business type and activities.

It's never worth the risk.

Speak to an expert if you are unsure.
